- 140-SP CAFS Compressed Air Foam System
- Lateral control panel
- VMUX electrical multiplex system with LED lights
- Modular aluminum body
- Roll-up doors
- Rear compartment for storage
- Two-section manual aluminum cover
- 300 IG polypropylene tank

## FEATURES

- This category of vehicle is adapted for rapid interventions on main highways or locations that are difficult of access.
- The 4x4 version is an efficient performer in difficult road conditions or for going off-road.
- The 4-door version allows a complete intervention team to be transported.
- In spite of its compact format, it is equipped with nearly all types of fire-fighting systems, including water, foam and compressed air.
- Its 300-IG water tank optimizes its capability and performance when used with the compressed air system.
- The large amount of compartment space allows all the necessary fire-fighting equipment to be carried.
- Even if this vehicle is entirely equipped, it can still be adapted to the specific needs of fire departments.
