- 3000 EVS automatic transmission
- 1250 IGPM QMAX Hale midship pump model
- Lateral control panel
- VMUX electrical multiplex system with LED lights
- Modular aluminum body
- Overlap doors
- An enclosed side-mounted compartment for portable tank
- Manual tilting rack for ladders
- Suction hose brackets
- 2500 IG polypropylene tank
- Manual rear dump valve with swivel

## FEATURES

- This vehicle, which combines the functions of a pumper, is one of the most popular in this range of tankers of 2000 IG or more.
- The portable tank is stored in a closed compartment.
- The rear discharge valve turns through 180° and is equipped with a tilting extension.
- A large-capacity hose compartment is located above the tank.
- In spite of the tank capacity, several compartments are available for storing equipment.
- The 4-inch rear inlet has no valve and is not subject to freezing in winter. The system is installed inside the reservoir, away from the cold.
- Roll-up doors are also available on that model.
